STYLE, TRADITION, DESIGN AND TECHNOLOGY: THIS IS MADE IN ITALY

Totally

   made in italy

If Made in Italy has become an authentic global brand, it is due to two factors: superior product quality and unique, elegant design. Even in the simpler lines Italian style is always distinctive, combining craftsmanship and creativity to create attractive but at the same time practical designs. Our cooking appliances are inspired by simplicity and passion as the ELBA brand is completely Made in Italy from the design stage to production of the individual components.

We have chosen to maintain all manufacturing stages in our country in order to benefit from the added value arising from a combination of working procedures, creative processes, know-how and expertise. Evidence of those values, such as attention to detail, the long tradition of stylish design and meticulous attention to customer requirements are found in all ELBA products, vouching for their authenticity and excellence. Our ambition is to be the mainstay of your kitchen: a unique space that merits desirability, practicality and quality at the highest level.

oven functions symbols

OVEN LIGHT

Illuminates the inside of the oven, enabling better viewing of the dishes.

CONVENTIONAL COOKING

The heat comes simultaneously from the top as well as from the bottom of the oven. Ideal solution to cook cakes, roasts and bake any kind of food.

ELECTRIC GRILLING

This function operates the variable electric grill, you can use low setting for grilling a relatively smaller amount of food, such as snacks or toast and a high setting for quick grilling.

BASE HEAT ONLY

The heat coming only from the lower element is used primarily for food that needs a higher temperature at its base. Perfect for cooking of cakes, pies quiches, pizzas and pastrys.

FAN ASSISTED GRILLING

The fan combined with the grill function enhances and speeds up the operations of grilling and cooking of gratin, with an even distribution of the heat. Can be combined with rotisserie where available.

KEEP WARM (LOW HEAT)

By setting the temperature at 50°C and using the fan to spread the heat evenly, you can easily keep cooked food warm without spoiling it for those unexpectedly delays.

TRUE FAN COOKING

The combination between the fan and the heating element located around the fan, allows the cooking of many kinds of food. Cooking can be made on different levels, without mixing flavours and aromas.

DEFROSTING

When is set, only the fan works, without the heating element. This allows the circulation of the air inside the oven and facilitates a rapid defrost of frozen foods.

PLATE WARMER

This function allows you to serve food on warm plates just like top-class restaurants.

ROTISSERIE WITH GRILL

The rotisserie function is combined with the grilling element or grill and the upper heating elements together to ensure uniform browning all over the surface of the food.

TOP-HEAT ONLY

The heat coming only from the top element of the oven allows to complete the cooking of those dishes that require a light browning on the surface.

GAS COOKING

Conventional gas cooking. Perfect for high intensity cooking and ideal for any meat, sealed but not dry and well-cooked on the inside. It is the favoured option of all the top chefs. Can be combined with rotisserie where available.

TOP-HEAT FAN ASSISTED

The heat is spread by the fan especially on the top area of the cavity. The temperature can be regulated by using the thermostat knob between 50°C and the higher settings. This function is recommended for keeping warm food after completing cooking.

FAN ASSISTED COOKING

The operation of the fan combined with the conventional cooking spreads the heat evenly throughout the oven. Perfect to cook food that requires the same level of cooking inside as well as outside, like roasts, fish, chickens, turkey and large roasts. It is also possible to cook many meats simultaneously on more levels.

FAN ASSISTED GAS COOKING

Used to obtain a uniform temperature throughout the oven, improving the cooking results and optimizing energy consumption. It is possible to use the oven even with a temperature of 130°C without the risk of extinguishing the flame. Can be combined with rotisserie where available.

VINTAGE COLLECTION

Providing your kitchen a
nostalgic atmosphere with
Elba Vintage cookers

FEATURES OF

Vintage

1. Refined details

The vintage style is also in the design details, such as the comfortable electronic programmer. In addition, the bright chrome handle is available on all **Elba Vintage cookers**, as a replica of the handrail found on the original Elba stoves, giving the kitchen a traditional trait.

2. Large cooktop with durable cast iron pan supports

Stainless steel five-burners gas top.
Heavy and durable cast iron and wok supports are included.

3.

3. **Vintage Knobs**

Inspired by the original wood-burning stoves that our founder created in 1950, **Elba Vintage Cookers** are controlled by **knobs with stainless steel finishing**.

4. **Charming finishing touches**

Gently curved stainless steel back guards softly rounded paneling on the oven fronts are complemented by **retro brushed steel control knobs and matching handrails**.

EXCELLENCE COLLECTION

Inspired by professionals

FEATURES OF

Excellence

1.
Brass dual burners

Hobs feature stylish **brass dual burners** that are extremely hard-wearing for superior heating performance.

2.
Double finishing handle

The Excellence collection is equipped with a double-finishing handle: brushed metal in the center part and chromed finishing at the ends.

3.

3.

Unique features

All **Elba Excellence dual fuel** and **electric Cookers** include a **touch control electronic programmer**, ensuring both precise and flexible cooking.

4.

Brushed metal finishing knobs

Brushed metal finishing knobs with outer bezel, giving the kitchen a very professional appearance.
